INTELLIGENT FIRE

A B O U T P L A N I K A

Planika is the worldwide leader of new trends in the luxurious and intelligent fire design. For more than 10 years, the company has been using the real fire as a key element to create the atmosphere of warmth and splendor. Planika has been appreciated by many architects and institutions in more than 60 countries. With branches in Europe and in the USA, the company cooperates with the best designers all over the world, for instance Serge Atallah and Christophe Pillet. Planika has been noticed during various and highly prestigious events, such as Milan Design Week, Maison et Objet in Paris, ICFF in New York and Design Fair in London.

I N T E L L I G E N T F I R E

Have you ever thought that combining the newest technology with the sense of real fire is possible? In truth, it became the most innovative solution of contemporary design. Driven by the progressive development, Planika comes up with the “Intelligent Fire”. Our automatic fireplaces can be controlled remotely either with any smart device working over WiFi or with the attached remote. The fireplaces are also compatible with any type of Smart Home System installation.

FIRE MADE TO MEASURE

Planika's fire inserts can be customized to fit any exquisite project. In order to meet the unique expectations, various length options of fire inserts are available. By placing several units together it is possible to create the endless line of real fire, as it took place in several high-class hotels and elegant residential projects. With no hard connections and exhaust system requirement, our fireplaces give unlimited arrangement possibilities to turn one's vision into reality. Stylish and exclusive, Planika's fireplaces are perfect for both commercial and residential purposes. Our Outdoor line allows to take the mesmerizing beauty of fire outside the apartment. Either at the grand gala in the hotel or at the back of one's garden, Planika brings the touch of luxury utterly enhancing the atmosphere of the place.

SAFETY AND QUALITY

The intelligent fire, now tamed with the patented technology, is the safest option to obtain the ambience of real flames that can be utterly controlled. Awarded with several international certifications, Planika lives up to the highest standards of safety. There are multiple sensors, e.g. CO₂ and temperature, that are connected to the microprocessor and guarantee the correct operation of the fireplace. Furthermore, thanks to patented BEV technology (Burning Ethanol Vapours technology) where there is no direct contact between the fuel and the flame, the fire burns with no smoke, no smell and no ash.

Choose Planika, the most innovative and luxurious fire solutions,
to capture the ambience of real flames.
Bring your unique idea to live.
